

Feature roadmap

Daily

The superintendent daily reporting tool you've been waiting for. Simply and elegantly store and collect data for daily jobsite reports from any device or platform, and integrate it with the tools you already use.

Integration with third party applications

Continue to expand on third-party integrations with Cloud Push, which Automatically pushes Daily data to other popular daily reporting to like BIM360 Field, Procore, Box

PlanScan integration

You already planned your day using PlanScan so why do you need to write out the things you did today? Let Daily pull that information from PlanScan.

Android support

We will be adding an Android version of the FlyPaper mobile app to the Google Play Store

Sherlock

The one tool that distills your Navisworks workday down to only a few seconds. A truly powerful tool, designed to simply work.

Batch

Adding the ability to batch rename clashes and to batch export fbx models based on selection and search sets.

Reporting/Clash tracking

Automatic clash tracking with the ability to report on the overall progress of coordination broken down by trade. Publish viewpoints of clash groups with Orient floor plan and 3d view viewpoints.

BIM 360

We will be making a new cloud based version of Sherlock. This will allow us to bring Sherlock features to BIM 360 coordinate and additional functionality that you may be missing from Navisworks.

PlanScan

PlanScan is a powerful Pull Planning tool that enables you to seamlessly merge your existing sticky note based process with the tracking and management capabilities of a cloud-based collaborative platform.

Collaboration

PlanScan allows you and your team to create and manage all aspects of the Pull Planning process. From Activities to Constraints, to Milestones, to assigning Predecessors and Origins.

Third party integrations

Easily import activities from Primavera P6 and keep P6 up to date with schedule changes made during Pull Planning.

Physical sticky notes

The beauty of PlanScan is that it maintains your existing sticky note based process or it can be done completely virtually. At any time you can print activities and milestones onto sticky notes for use on a physical board and when activities move on the board a simple scan with our mobile app automatically keeps the platform up to date.

Reports

With PlanScan you can produce powerful reports with a click of a button. Get a full 2-week lookahead report, see how your team's Percent Plan Complete improves over time and view a current report of Constraints that are impacting work
