WHAT'S YOUR JOB AS A COORDINATOR?

MINDLESSLY CLICKING BUTTONS?

WE DIDN'T THINK SO.

The mantra behind Sherlock is to let coordinators do what they're good at and to leverage computers for the rest.

With a few simple commands, Sherlock transforms Navisworks™ into a high performance coordination machine that enables instant issue identification and simple ways to communicate about them with your team.

Features

Distill
Dead simple clash grouping based on your already established model hierarchy. Distill is here to save you valuable time and accelerate the production of usable models for your team.

HeatMap
One click to highlight the worst areas in the model. One more to tag your clash groups for your team.

Orient
Orient anyone to the exact pipe/conduit/duct section/etc you are talking about. Get back to coordinating as fast as possible.
